

Cardiothoracic Radiologist, Hybrid – Full-Time Southeast and / or Mid-Michigan

Progressive, radiologist-owned, outpatient imaging center seeking a Radiologist with Fellowship training in the following discipline: Cardio imaging, chest imaging, including lung screening, cardiothoracic, vascular imaging.

At **Regional Medical Imaging** we work hard to create a unique environment, not just for our patients, but for our associates. Team members are guided by our core values of integrity and respect, with a constant focus on our customers, both referring clinicians and patients. Our approach to patient care includes personalized service that is delivered in facilities that are more home-like than clinical.

We are looking for a fellowship-trained Cardiothoracic Radiologist who believes in our core values of putting patients first, allowing you to become a key player in our growth.

We understand and value the relationships we have with referring clinicians. As such you will be involved in generating relationships and providing education and consultation in collaboration with our sales and marketing team. RMI radiologists are supported by the latest tools and technology to enhance efficiency and provide flexibility, including the ability to read remotely.

The successful candidate should have completed Neuroradiology Fellowship and be Board certified or Board eligible. If this sounds like a good fit and you're ready to help us grow our practice, we invite you to submit your credentials for consideration.

Salary & Benefits:

Competitive Compensation, Vacation; CME allowances; professional liability; health, dental & vision insurance; and 401K.

Submit your letter of interest and CV to:
